

N,N-Diethylhydroxylamine (DEHA)

Product Name	N,N-Diethylhydroxylamine (DEHA)		
Other Name	Diethyl Hydroxylamine; N,N-Diethyl Hydroxyl Amine; Diethylhydroxylamine; Diethyl Hydroxyl Amine		
CAS No	3710-84-7		
Molecular Formula	C ₄ H ₁₁ NO		
	Molecular Structure		
	Check-Point	Specification	
	Appearance	Colorless To Light Yellow Liquid	
	Purity	≥85%	≥95% ≥98%
	Water	≤15%	≤5% ≤2%
	Diethylamine	≤1.0%	≤0.5% ≤0.3%
	Colority	≤70APHA	≤70 APHA ≤70 APHA

Packing: 170kg plastic drum

Product Usage:

- 1.As a vinyl monomer, used in efficient inhibitor agent of conjugate olefins.
- 2.In liquid or gas phase, if end gather seed is existed,it can be used as inhibitors of end gather.
- 3.It's a excellent end agent in process of Emulsion-polymerized styrene butadiene rubber.
- 4.It's a antioxidants of the unsaturated oil and resin.
- 5.In the environmental protection,it's good photochemical smoke inhibitors.
- 6.It's used as corrosion inhibitors in the equipment of the boiler feed water and steam heat exchange.
- 7.It's used as antioxidant in photography screens potions. Pay attention to level, it must be the photography level,and appearance is colorless liquid. Industrial level can not be used here.
