

N-Butyl Benzene Sulfonamide (BBSA)

Product Name	N-Butyl Benzene Sulfonamide (BBSA)	Molecular Structure	
Other Name	N-Butyl Benzenesulfonamide; N-Butyl Benzene Sulphonamide		
CAS No	3622-84-2		
Molecular Formula	C ₁₀ H ₁₅ NO ₂ S		
Check-Point		Specification	
Appearance		Colorless Transparent Liquid	
Purity		≥99%	
Acid Value		≤0.1KOHmg/g	
Water		≤0.3%	
Colority		≤20APHA	

Packing: 200kg iron drum or 1000kg IBC Drum

Product Usage: It's a kind of excellent polyamide resin & cellulose class of liquid plasticizer, mainly as a plasticizer to be used in nylon plastic, and also can be used for hot melt adhesives, rubber latex adhesives, printing ink and surface coating.
